

LOGNOTE--Okinawa Bureau, 28 September 1983

1. [] Land Survey Bolo Point--Last week I concurred in a request from Deputy Commander, Civil Engineering, 18th Combat Support Group to permit the farming area at our Bolo Point site to be surveyed at the request of the Naha Defense Facilities Administration Bureau (NDFAB). The survey is to be done by a civil contractor, Pioneer Construction Company, Ltd. and permission was granted to give them entry to our antenna field area up to 31 January 1984 for the purpose of this survey. I later called Harry M. Okuhama, Chief Real Estate Management, 18th Combat Support Group to ask whether he knew the background regarding this survey. He said he did not, but since the NDFAB had recently surveyed a Marine munitions depot and the Kadena Air Base he thought it was part of their overall survey plan. He volunteered to see what he could learn and I thanked him for the offer. He also offered to ask the NDFAB to send a representative to call on the Bureau with their contractor when they begin the survey so that [] can discuss with them any considerations he may have with regard to the antenna field. I also asked him if the NDFAB would be advising the Mayor of Yomitan that surveyors would be in our area. He said he thought that was policy but would check on it. (Land File, C/OPS)
